

260sqm house , Tel-Aviv by: Navot Rubin Architecture

Photographs: Shai Epstien

Planning and interior design of 260sqm house in northern Tel-Aviv, for a family with four children. The main staircase located in the center of the house divides each floor to two parts: The ground floor is divided to living room and master bedroom, the 1st floor separates the children rooms, and the basement is splitted to a gaming area and guests unit.

Natural materials were used, such as exposed concrete and woodwork.
